Cleaning Faucet Aerators / Who Does the Cleaning, Again?

Cleaning Faucet Aerators. Aerators keep the water flow of faucets from splashing about when you turn the faucet on. They contain a metal screen circle that does the job.

Ideally, the water then has a lovely circular flow of combined air and water. Sometimes, the water stream is shaky or crooked. It happens when the metal screen has become partially clogged.

You can remove the screw-on device that holds the screen and use a toothpick to unclog holes. Or put the screen in vinegar to soak overnight.

If that doesn't work, a new screw-on device costs only about \$5.

The aerator is an environmentally friendly device. It limits water flow by mixing it with air.

Who Does the Cleaning, Again? Merry Maids regularly does surveys of families on the topic of cleaning, but there seems to be a dispute between moms and dads as to who actually does the scrubbing.

In May 2017, moms were interviewed for Mother's Day and 85 percent said they clean the house.

On the other hand, 34 percent of moms said hiring someone to help clean was a necessity.

But by June 2017, another Merry Maids survey found that nearly half of dads said they clean the house.

Maybe moms are hiring the dads?

Thanksgiving Sleepy: It's about the gobbler, but not the one you might think

It has become a truism: You get sleepy at Thanksgiving because of all that tryptophan in turkey.

But is it true? Yes and no, but mostly no.

It is true that the amino acid tryptophan works as a precursor to other sleep-inducing chemicals. Turkey has lots of it. But cheese and nuts have more. Even Tofu-turkey has more, according to Wired.com.

In 1972 a psychiatrist named John Fernstrom looked into the tryptophan connection and found that tryptophan alone does not make you sleepy. Instead, he found that it's really a carb-heavy meal of mashed potatoes, pie, dressing, and bread. Those carbs create loads of sugar and force amino acids to go to work breaking it all down. With amino acids busy fighting sugars, the brain starts converting tryptophan into serotonin and suddenly you feel you just can't watch another third and 10 on the game. Snores ensue.

It's not just the chemistry of the meal, however. The parasympathetic nervous system also has a role to play. This little brain gadget does things in the background so you don't think about them; like breathing. When you eat too much, you have to digest a lot. The parasympathetic nervous system kicks in to give the body energy to digest and takes away energy elsewhere. You feel tired and it's because you ate a really big carb-loaded meal. Too late to do anything about it. Just kick off your shoes and don't blame the turkey.

Antiviral Drugs Still an Option for Flu

The best prevention during flu season is following the standard advice: Get a flu shot and wash your hands before eating or touching your face.

But if you do get the flu, certain antiviral medications like Tamiflu (oseltamivir) and Relenza (zanamivir) are still available as a treatment, according to the Harvard Health Letter.

These antivirals must be taken within two days of the onset of symptoms to be effective and might speed recovery by one or two days.

In June, the World Health Organization removed oseltamivir from its list of essential medicines, citing low effectiveness in clinical trials.

However, this drug and others in the antiviral category do help some people if taken early enough. Older people and those with chronic lung, heart or kidney disease, or compromised immune systems would be a candidate for the flu drugs.

Dry comforters/blankets/bedding more thoroughly and evenly by adding two or three tennis balls into the dryer load.

Do You Know...

... someone that could use our services?
Perhaps a friend, family member, co-worker, or someone from church?

When a new client signs up for regular cleaning services at your recommendation; you receive a special gift from me and our new client will receive a \$25.00 additional cleaning service for free!

If you think someone could use our services, then don't hesitate to call them and give them our name and phone number. Be sure to have them mention your name when they call so we can send your gift!

Thanks in advance for your help!

Thanks a Bunch!

"The two ladies who came to were great. I hope they will be my regular ladies."

~~Gerry K

"I think the teams have been very responsible with our home and paid attention to our preferences amazing well so far, and we look forward to seeing the results of these changes as well."

~~Molly M

Kid-friendly Podcasts

Podcasts have exploded on the internet to become one of the fastest-growing ways to consume content (and make content) quickly. Anyone with passion and a little technical know-how can get a show off the ground provided that they have an interested audience. This ease of entry ensures that there is a broad range of topics covered to suit all tastes and interests; and that includes the interests of kids.

Children are typically drawn to the games on smartphones and tablets, but kid-friendly podcasts can be a great way to help them learn in a way that interests them. Lifehacker breaks these podcasts down into three categories: parents listening alone, parents listening with kids, and kids listening on their own. Podcasts that fall into the second group are probably the most intriguing because they are designed to get parents and kids talking about topics together and asking questions. A great place to start is with *Stuff You Should Know* and *Stuff You Missed in History Class*, which are both from the popular site *How Stuff Works*. These podcasts are a great way to be a highly engaged parent helping to develop curious minds.

Turn left at the hen house; Imagine living without an address

We take for granted the orderly grid of streets and signs and numbers that locate us in the world. But what if there were no addresses?

You could get email on your phone, and maybe you could order something online but you couldn't get it delivered. You could tell someone where you live but not how to get there. You could call a repairman but he wouldn't be able to find you.

Four billion people in the world live in just that situation, but a new tech startup is changing that by giving every three-by-three-meter spot in the world a three-word name. What3words gives a memorable three-word name to every spot on the globe and then cross references that spot on maps using latitude and longitude.

This makes a huge difference in places like the Brazilian favelas. Favelas are the Brazilian name for shanty towns, spontaneous cities of make-do buildings. Favelas can have tens of thousands of people living in a colorful chaos of shacks, concrete homes, street vendors, and businesses. But the people living on the thousands of winding paths and streets don't have addresses.

Local delivery services once used creative directions: Go past three pink houses, then a hen house, then a vendor, then turn left. That system worked, but things tended to change over time. Like a pink house might be painted blue. Enter What3words. Now, even in the thick of a favela, residents can put a three-word sticker on their door and a delivery service can find them.

This system is even in use in Denver where the fire department uses it to find its 50,000 hydrants. It's also used in Lake Tahoe for ski rescue and by delivery companies who need to get packages to locations in the Middle East, North Africa and Southeast Asia.

You may not know it but even if you have a conventional address, you also have a three-word address. Check it out at what3words.com.

Answers to 'On the Right Track'

The Link Between Sitting and Poor Health

We drive to work, sit at a desk, drive home and watch television -- that's all sitting time and it's bad for health.

According to the American Heart Association, Americans spent about 38 hours per week sitting in 2009 compared to only 26 hours in 1965. This rise in sedentary behavior, along with a decrease in the amount of time spent performing a moderate-to-vigorous activity, has been linked to several health issues including increased risk of cardiovascular disease, diabetes, obesity, and back pain.

According to Time Magazine, the body needs energy to power individual cells, break down and digest food, and create "activity energy" which can be divided into active exercise and Non-Exercise Activity Thermogenesis (NEAT). The last type, NEAT, includes all of the energy used for required movements throughout the day like walking or even typing at a desk.

Sitting for extended periods of time lowers the amount of NEAT energy needed throughout the day which starts to turn off processes that burn calories and turn on the ones that build fat. Inactivity, especially around meals, leads to muscles that aren't soaking up glucose from the food and become more insulin resistant. This resistance causes the body to release more and more insulin which can lead to diabetes over time.

Sitting can lead to a whole host of other issues in the body related to pain and overall fitness because of the position of the body. The hips, for instance, remain unextended for long periods of time and can become tight with a limited range of motion along with weakened glutes. This decreased range is a primary reason why the elderly are prone to falling. Similarly, the position can cause poor circulation in many areas of the body such as legs, spinal discs, and the brain.

BOGO Gift Card Promotion

Buy one gift card at \$160.00, and get on **FREE** worth \$160.00. This offer is intended for new clients. Offer expires 12/31/2017. Offer is open to recurring clients with some restrictions.

These gift cards make awesome holiday gifts! Call today and get a jump start on your holiday shopping.

Daylight Savings Time

Ends

Sunday, November 5th

Undoubtedly, you have noticed that the days are getting shorter. Don't forget to turn your clock back one hour before going to bed on Saturday night, November 4th.

Sunday is a good day to take the opportunity to replace batteries in gadgets such as clocks, smoke and carbon monoxide detectors, and home alarm systems.

I am already longing for longer, warmer days.

Operation Care Package

Two Ladies & A Bucket is gearing up for the upcoming holiday season. We are collecting items to send to our active troops. Below is a list of items that we could use. Any contribution is welcome. No donation is too small. Many of our service men and women are young parents. One of the biggest item(s) that we are wanting are hand drawn pictures and cards from your children addressed to 'My Hero'.

Summer Sausages and Slim Jims	Crackers	Puzzle Books
Pads of Paper	Greeting Cards	Long Envelopes
Dental Floss	Lip Balm	Toothpaste
Deodorant (Mens & Women)	Shaving Cream	Foot Powder
Odor Eaters	Sunblock	Mosquito Repellant
Wet Wipes	Anti Bacterial Soap	Travel Size Hand Sanitizer
Shampoo	Conditioner	Tooth Brush
Protein Bars	Batteries Of All Sizes	Jerky type dried meats
Canned Fruit	Dried Fruit	Seeds and Nuts of all kinds
Phone Cards	Canned meats	Canned Soup
Cookies	Crackers	Microwave Popcorn
Multi Vitamins	Tylenol	Ibuprophen
Hot Chocolate	Hot Cider mixes	Coffee Singles or 2lb bags or cans
Canned Chili, Stew, Ravioli	Sweat Pants and Blankets	Granola Bars

Happiness is not a goal; it is a by-product. ~Eleanor Roosevelt
